

BETTER TECHNOLOGY FUELING PROACTIVE INCIDENT MANAGEMENT

PUBLIC ACCESS-READY

Can serve not only authenticated users but ready for general public use. Edge-architecture allows safe and scalable public-facing service.

ROLE-BASED ACCESS

Can structure the access control based on organization chart, hierarchy and sync with an existing directory service.

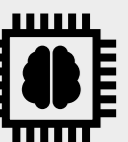

CUSTOMIZABLE UI

API-centric flexibility (platform) that can work with virtually any external systems, customizable, and extendable.

REPORTING AND BI

Various analytics as well as reports can be hosted. Data hosted are exportable to PDF, Word, and Excel.

AI FOR PREDICTIVE SAFETY INCIDENT MGMT

Add-on modules with AI prediction and anomaly detection.

NOTIFICATION

Able to send notification via Email, SMS (Text), or Voice based on pre-configured business logic. Messages are templated for easy customization.

WEB-BASED

Kokomo24/7™ was born in the cloud. Unlike incumbent players, it's built ground up with emphasis on EUX (end user experience) and built to scale in cloud.

GIS-ENABLED

Situational awareness and GIS platform can link to various GIS sources.

SECURE

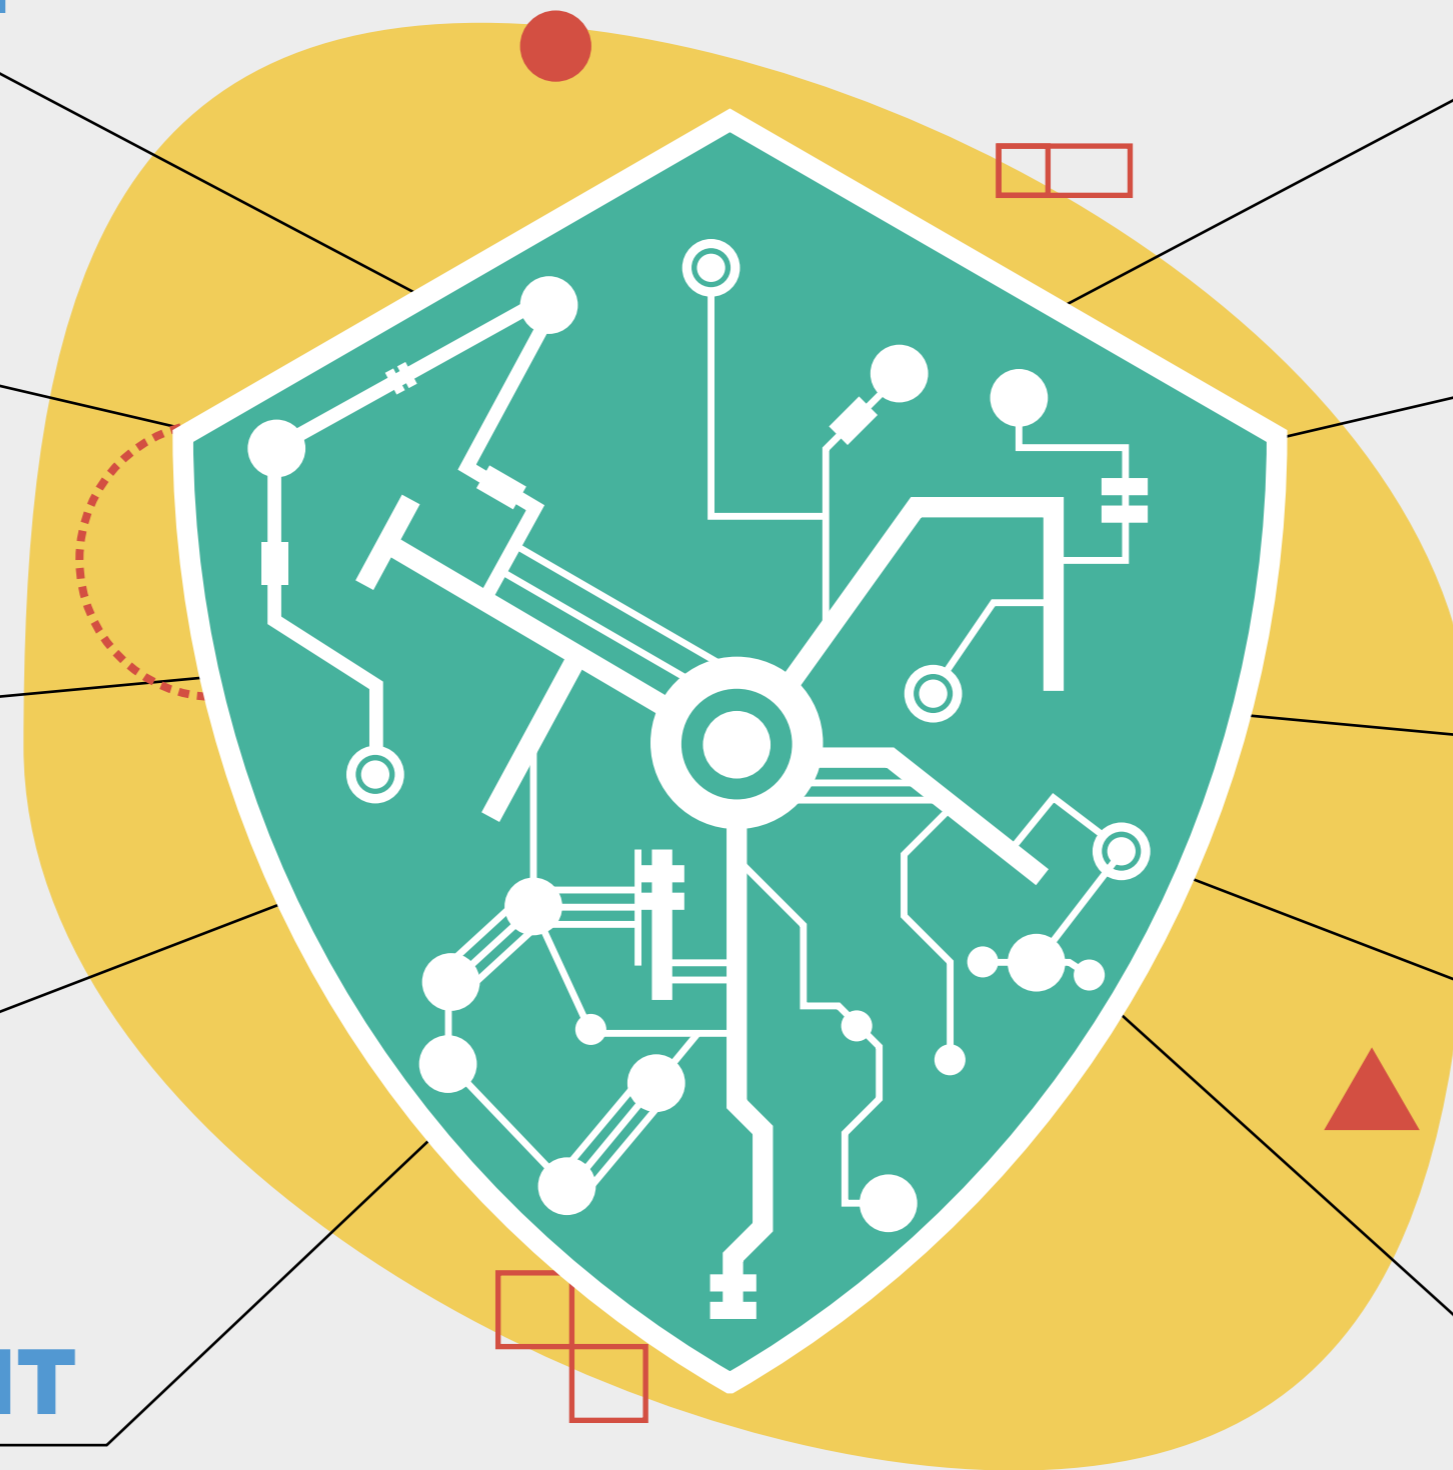

FIPS, FedRAMP, GovCloud, HIPAA-compliant solution that employs the industry's latest security protocols such as AES-256 and Secure Crypto.

FORM BUILDER

System can generate unlimited custom forms with built-in form builder, or store standardized forms for compliance.
